An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for February is 5.7 percent, four-tenths of a percentage point below the national rate of 6.1 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during February 2002 was 2,935,200.

Indiana's February unemployment rate was lower than Illinois, 6.4 percent; Kentucky, 6.0 percent and Ohio at 5.8 percent.

"Indiana continues to experience an increase in its unemployment rate.

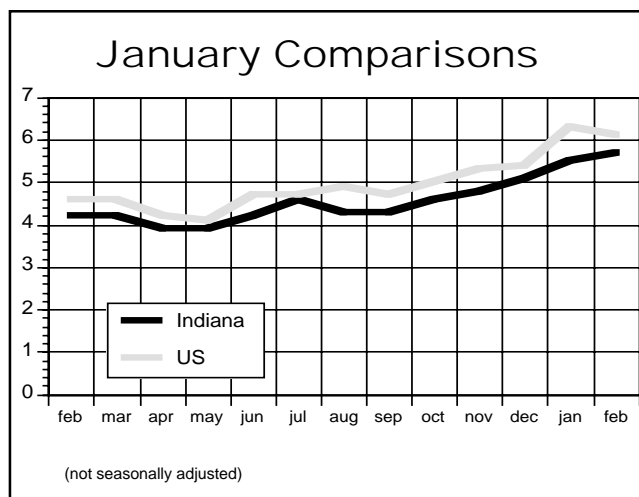

This is the highest rate the state has seen since July of 1995. We continue to be concerned about the number of manufacturing jobs that have been lost during the past year along with 5,200 more Hoosier workers unemployed in February," commented Hartzer.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,876,700, a decrease of 35,500 from one year ago and 13,800 more than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 616,000 in February, a decrease of 40,000 from last year. Motor vehicle manufacturing accounts for 89,800 jobs, 5,400 less than one year ago. Manufacturing of motor vehicle parts totals 59,100. Industrial machinery manufacturing in February accounts for 64,500 Hoosier jobs, 200 less than January.

Construction employment totals 130,900 a decrease of 300 from last month. Of that, heavy construction reports 13,100 jobs, an increase of 800 from last year.

Service producing employment totals 2,123,100 in February, 3,600 more than last year. Transportation and public utilities total 142,000, 1,500 less than January.

(over)

Retail trade totals 536,800, 3,800 less than a year ago. Of that, general merchandise stores report employment of 78,200, or 3,700 less than last year. Service sector employment, such as business services, computer and data processing, totals 738,700 in February, which is 3,900 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,111,100 in February 2002. An estimated 2,935,200 Hoosiers are employed and 175,900 are unemployed.

Indiana's labor force for February 2001 totaled 3,052,400. Hoosiers employed one year ago is estimated at 2,924,400, and January 2001 unemployed in Indiana totaled 128,000. Indiana's estimated unemployment rate one year ago was 4.2 percent, compared with the national unemployment rate of 4.6 percent in January 2001.*

*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.
